

Shaver Enclosure Protects Seasonal Products From Dust and Wear

A retail home improvement centre wanted to enclose its seasonal retail area so that it could be used as a clean and effective storage area during the winter months. Shaver acted quickly and designed and installed flexible curtain walls.

The client was immediately impressed with the durability and performance of the curtains. The Klearspan material allowed natural light into the enclosure and was durable enough to protect merchandise from dust, dirt, and even the weather.

Shaver's curtains have not only created an excellent storage space, they've also helped deter vandals and cut down on theft resulting in all-around better business operations for the retailer.
