

SHAVER INDUSTRIES INC.

Bellows for Lift Tables and Elevating Platforms

Our bellows have been tested and approved in various ergonomic and material handling applications including the automotive and medical industries. They protect equipment from foreign debris while providing a safety barrier for employees, and are available for platform dimensions of up to 30 square meters.

Our new state-of-the-art thermally bonded bellows have a proven record with lift tables for the automotive sector and considerably reduce downtime and maintenance.

Stitched Bellows

- Available for almost any size or style of lift, tilt and lift & tilt tables.
- Tear resistant heavy duty vinyl in alternating yellow and black or all one color.
- Thermally welded corners maintain a uniform clean look while providing additional strength where it is needed.
- Standard 3" fold depths or non-standard fold depths of 1.5", 2", 2.5" or 3.5" also available for restricted space or low retraction/ compression applications.
- Mountings include a top and bottom pocket for pvc or metal strips. Additional mounting options also available.

Steel rods are inserted (at factory or by customer) into sewn pockets providing rigidity and stability to all sides.

Strong vinyl-coated mesh venting sewn into the top of each unit, allowing for influx and expulsion of air as the enclosure cycles up and down with the table.

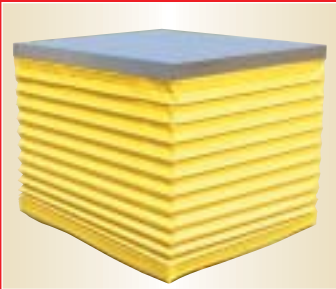

Over-extension straps are sewn in on the inside of the units providing uniform extension of each fold reducing wear and tear on the stitching.

New Style Thermally Bonded Bellows.

Aesthetically pleasing appearance while providing added rigidity and stability.

Lift tables can be customized with your company logo to provide a professional look.

New Style Thermally Bonded Bellows

- Stiff PVC supports thermally bonded into each convolution providing even greater rigidity and strength than conventional steel rods (stitched construction).
- Available for almost any size or style of lift, tilt and lift & tilt tables.
- Tear resistant heavy duty vinyl – standard colors include all yellow or all black as well as custom colors to match your corporate look.
- More aesthetically pleasing appearance compared to sewn.
- Mountings include a top and bottom pocket for PVC or metal strips. Additional mounting options also available.
- Due to latest manufacturing technologies, these new style bellows can be made available at a price range similar to the traditional stitched bellows (depends on configuration and order size).
- Standard 2" fold depths or non-standard fold depths of 1" and 1.5" for applications with restricted space or 2.5" for low compression applications.

Available Options for all Lift Tables and Elevating Platforms

High Temperature / Extreme Environments - Our technicians can help specify the proper material for your environment.

Hook & Loop Mounting - Provides quick and easy installation and/or removal of skirt for easy access when performing maintenance.

Zippers - Zippers are installed for retrofits where the enclosure may not be easily slipped over the table.

Mesh Venting - Standard on stitched style and optional on thermally bonded style.

Maintenance Straps - Holds the skirt up against the underside of the table for ease of access when performing maintenance.

Company Logo - Maintain a professional, uniform and safe look to your equipment while promoting your name.

Roll-Up Covers and Aprons - Provides an economical solution when space is restricted, and a complete seal is not necessary. Roll-up covers and aprons are available in different types of standard and high temperature fabrics, aluminum slats as well as stainless steel.

Fabric roll-up cover as hazard protection on a lifting table.

We offer a complete line of machine and environmental protection systems.
